

Hands on groups for **Preschoolers & their Caregivers!**

Tricks of the Trade

Are you interested in utilizing the early childhood techniques that child development specialists practice every day?

❖ Come learn evidence-based practices to help your child:

- Effectively Listen to Commands
- Follow Directions
- Plan & Organize
- Interact Pro-Socially
- Increase Self-Esteem

❖ Each week will include separate parent & child meetings, as well as a joint opportunity to practice newly learned techniques:

- Parents will focus on skill-building & support
- Children will practice separation & social interaction
- Collaborative parent & child sessions will enhance skill-utilization with the assistance of early childhood specialists

Both children and adults can benefit! The group experiences provide social opportunities, enhance behavioral skills, and encourage connections that can grow into positive and respectful relationships.
