New Office Protocols

Susan Myket, Ph.D. & Associates has always held the health of our clients and clinicians in the highest regard. In light of COVID-19, we are taking a number of additional steps to ensure that our office protocols provide us all with a clean environment to conduct therapy and assessments.

We are adjusting our appointment start times, eliminating our waiting room, changing entrances, and reducing the volume of clients in our office on a daily basis to keep interactions to a minimum and to allow for disinfection of commonly touched surfaces between clients.

We are following CDC and IDPH guidelines for a healthy clinic environment. These include daily cleaning & disinfecting regimens, improved air filters & ventilation, air purification & sterilization, wearing masks in common spaces, and social distancing.

We are continuing to provide the majority of our services through telepsychology at this time. We plan to flexibly move between telepsychology and in-office services as clinical and health needs dictate.

Check In Procedures:

- Your clinician will meet you in the parking lot at your assigned time.
- Please wear a face mask.
- Temperature check and health screen.
- Hand sanitizer will be provided.
- One parent of a young child may wait in the waiting room.
- Parent & clinician discussions will happen at car or by phone during session.
